Abstract (en)
A faucet support structure (10) for use in combination with a plasterboard wall (12) is provided. The structure (10) comprises a pair of spaced-apart metal strips (14,16) attachable to a plasterboard wall (12), and at least one hollow substantially L-shaped housing (24) mounted between the metal strips (14,16) for mounting a faucet (26) therein. The housing (24) has a first opening (28) projecting through one of the strips (14) for insertion therein of the faucet (26), and a second opening (30) having an axis extending between the strips (14,16) for insertion therethrough of a water supply pipe (32). <IMAGE>
