Abstract (en)

[origin: WO9937353A1] A clamp (10) for securing a catheter (21) or the like to an object (20), such as the shin of a patient comprises a base affixed, in use, to the object (20) and a flap connected at one end to the base. Securing means (12, 13) secure the flap to the base so as to retain the catheter (21) or the like. A portion of the base and/or the flap which, in use, encloses the catheter (21) or the like carries a resilient pad (14) coated with a non-adhesive synthetic resin (15).
