Abstract (en)

[origin: US6454642B1] The invention relates to a device for sharpening knives, scissors or other cutting tools with at least on abrasive grinding element which is arranged in a housing pushing against a resilient force. The aim of the invention is to provide a device that is simple in its design and that is characterized by its versatility. To this end, the grinding element is configured as a strip structure and is arranged on blade-shaped support which in turn is resiliently guided along the housing.
