Abstract (en)
[origin: CA2294974A1] A faucet apparatus is provided for dispensing heated liquid from an urn interior (A). The faucet includes an insulated foamed plastic body (B) made from foamed polypropylene or the like and has a liquid flow bore (12) defined therein. The foamed plastic body has a plurality of gas-filled insulative bubbles dispersed through the walls thereof and is adapted for connection to an urn (A) with the liquid flow bore (12) in fluid communication with an interior portion of the urn (A). The faucet includes a valve (C) connected to the body for controlling the flow of liquid through the bore (12) to a liquid outlet (34) of the faucet.
