Abstract (en)

[origin: FR2773823A1] Textile products obtained by spinning a polymer-based solution and the products obtained by spinning such products, consist of an acaricide selected from benzyl benzoate, carbamates, pyrethrinoids and pyrethrins contained in a polymeric material. Independent claims are included for: (1) the manufacture of the above products comprising subjecting a gel in which at least one of the acaricides is dissolved, to wet or dry spinning; and (2) fibrous material comprising the textile products or obtained by the above process.
