Abstract (en)

[origin: FR2773696A1] The housing has a catch (3) which is held in its locked position by a cylindrical metal weight (13) and released by a magnetic tool. The weight has a head (17) with a shoulder (16) which engages in the locked position with another shoulder (11) on a fixed component, the two shoulders lying perpendicular to the direction the catch has to move in to be unlocked. The catch is made in one piece from a plastics material with a cavity for the weight.
