Abstract (en)

[origin: WO9937895A1] A system and method for exchanging used hydraulic fluid with fresh hydraulic fluid in an accessed hydraulic fluid system. The system including a fluid exchange assembly (10) having a fluid receptacle (12) and an interior fluid separation member (18), which may be a distendable diaphragm member. The exchange system further includes features of automatic fluid flow alignment (24), an exchange mode indicating system, and a bypass system (19) for removing at least a portion of the exchange system during a bypass mode of operation.
