Abstract (en)
[origin: DE19803533A1] The invention relates to an axial piston pump comprising a pump housing (1), a motor-driven shaft (2), a swash plate (3) connected to the shaft (2) in a rotationally fixed manner, and a number of pistons (4). The swash plate (3) permits the pistons to move in a back and forward manner. According to the invention, the axial piston pump is configured in such a way that the shaft (2) extends through the pump housing (1), and the swash plate (3) is arranged outside said pump housing (1).
