Abstract (en)

[origin: WO0025426A1] A loadable counter circuit which is able to perform multiple contiguous counts. The loadable counter circuit uses a counter (12) for monitoring a number of specified events. A data storage device (14) is coupled to the counter (12) for loading the counter with counter values for each of the contiguous counts. A control logic circuit (20) is coupled to the counter (12) and to the data storage circuit (14) for loading the counter and the data storage device with the counter values.
