Abstract (en)

[origin: WO9857474A1] The invention concerns a method and a system for using a smart card capable of being inserted in a terminal equipped with an explorer, comprising the following steps: storing in the card an Internet provider's address, an IP address and the card user's other personal Internet data; inserting the card in a card reader connected to the terminal; and activating the explorer to use the personal Internet data when the terminal is connected to Internet.
