Abstract (en)

[origin: DE10019354A1] The screw-in socket with integrated valve (1) can also be located between the valve heating body and the back flow screw formation (5) in forward flow (4) and back flow (6). Further alternative arrangements are for the screw-in socket with integrated valve to be located between the valve heating body and the tap block in forward and back flow or between the valve heating body with Euro cone and the tap block in forward and back flow.
