Abstract (en)

The heating body (1) has at least one heat-emitting plate (2), with which is connected at least one heat-conducting convecto clamped between two plates or one plate and a fixture component. The convector comprises at least one meander-shaped bent plate of aluminum. Between two parallel convector plates running to the heat-emitting plates runs a double-sided adhesive strip parallel to the plates or a self-adhesive fabric. The fixture component is a rail connected with one plate or a metal sheet connected with one plate.

Abstract (de)

Ein Heizkörper (1) weist mindestens eine Wärme abgebende Platte (2) und ein wärmeleitend damit gekoppeltes Konvektblech (3) auf. Um zwischen dem Konvektblech (3) und den Platten (2) den Wärmeübergang zu verbessern sowie eine größere Flexibilität bei der Herstellung unterschiedlicher Heizkörpertypen aus wenigen Bauteilen zu schaffen, wird vorgeschlagen, daß das Konvektblech (3) klemmend zwischen zwei Platten (2) oder einer Platte (2) und einem damit verbindbaren Befestigungselement befestigt ist. <IMAGE>
