Abstract (en)  
[origin: EP1050865A2] Utility Model Patent for a device for signalling equipment, consisting of a combination of traffic lights, conventional or not, with elements capable of giving information by means of fixed or mobile luminous texts, allowing the observer, driver or pedestrian, to know the conditions both in the street where the traffic light is situated and in nearby streets, the duration of the colour of the traffic light, the permitted speed on the street, and any other messages which the traffic authorities should deem to be of importance.- <IMAGE>
