Abstract (en)

[origin: US6234369B1] The invention relates to a device for putting on hosiery, comprising a unit for mounting the hosiery which has two receiving parts which by way of guiding means can be spread in relation to each other between a resting position and at least one stretching position. In said device the positioning means form part of a drive unit embodied as an element which is separate from the mounting unit and said mounting unit can be temporarily and removably connected to the drive unit with a view to moving the receiving parts into the at least one stretching position. The invention also relates to the use of said device for putting on support hose.
