Abstract (en)
[origin: WO9939842A1] The coating of substrates, particularly polymers and ceramic or metal substrates, for the production of a polar, polymeric coating is conducted by plasma polymerization. The process gas used for this purpose is free from water or water vapor and contains at least one organic compound, in addition to an inorganic gas and/or carbon monoxide and/or carbon dioxide ad/or ammonium and/or nitrogen and/or another gas containing nitrogen.
