Abstract (en)

[origin: DE19854778A1] The invention relates to a knife guide (1) for knife elements (2) that are used to divide strips of material lengthwise. Said knife guide comprises a base body (3) that can be joined to a cutter bar and is associated with at least one displaceably mounted guide rod (7). One end of the guide rod is connected to an actuator. The other end of the guide rod is connected at least one articulated arm via a joint. A knife carrier (17) with a knife element (2) is arranged on said articulated arm. The joint (19) is arranged above the knife carrier (17) and is connected to an actuating means (21) that is disposed on the articulated arm (18) and rests on the base body (3).
