Abstract (en)

[origin: DE19901290A1] The formation of three mounting points(2,3,3'), which are located around the center of gravity(4) of the cab, is such that the connecting lines form a triangle. Viewed in the direction of travel, one mounting point is located in the rear or front section of the cab, while the two other points are located in the left and right sections of the cab. The mounting point in the rear section is located directly on its rear face, and preferably on its outer wall.
