Abstract (en)

[origin: EP1051997A1] The carriage (6) has a platform for road vehicles with a sprinkler system built into the platform. A line leads from one end the carriage to the other. Several lateral sprinkler nozzles (5) are arranged recessed along the edges of the platform, aligned produce a compact jet of extinguishing liquid (17) rising in a vertical plane and supplied via a sliding divider element and the line depending on a remote control signal. An Independent claim is also included for a railway tunnel with a deflection device for a rising extinguishing liquid strea
