Abstract (en)
[origin: EP1052330A2] The support mounting for a tongue rail (12) at a railway permanent way, for setting against the switch rail (10) and especia at direction change points, is a roller unit (28) which projects from a holder (26) which extends through the second fixed rail (14). The holder (26) is an angle unit which is generally parallel to the movement path of the switch rail (10). One leg (34) ha roller unit (28) and the other leg (36), at an angle to the first, is along the side (20) of the fixed rail (14) away from the switch rail (10), at least in sections.
