Abstract (en)
A safety and warning delineator, constituted by two vertically elongated substantially symmetrical half-shells (2,3) which can be coupled frontally to each other; the delineator comprises, at a lower end thereof, means for fixing to fixed supports and that at least one reflector element (10) and at least one luminous delineator element (16) are arranged on the front surface of the first half-shell (2), the luminous delineator element (16) being provided with an antiglare light source (17) which is circuitally connected to a power supply unit adapted to control the frequency and power of the supply according to environmental and/or danger conditions. <IMAGE>
