Abstract (en)
[origin: EP1052349A1] The door handle has a bearing yoke (3) for attachment to a door containing a pivotable handle part (4) with at least one induction coil (12) connected to electrical leads (17) passing into the vehicle. A handle pin (6) on one end of the handle part protrudes into the door and engages the door lock. The coil can be inserted into the handle via an end opening. The handle pin closes the end aperture (11) after coil insertion.
