Abstract (en)
[origin: EP1052359A2] The hinge has a first part (S1) connected for swivel movement to a second part (S2) with the swivel path restricted by a connector member (4) whose first end is fixed for swivel movement on the first hinge part and whose second end is displaceable a a restricted path on the second part. The second part has a U-profiled section with slit-like recesses set opposite one another in the arms of the U. An imaginary centre line of each recess describes a section of a circular curve.
