Abstract (en)

[origin: EP1052603A2] Cashless transactions are performed by transmitting information identifying a purchaser of a product without identifying a payment account for the purchaser. The transmitted identifying information is received at a central processing point and processed to determine if the purchaser is a registered purchaser. A notice confirming registration, which may take the form of a purchase authorization, is transmitted from the central processing point if the purchaser is determined to be registered. The transmitted notice is received at the point of purchase and a bill is generated for the purchased product responsive to receipt of the notice. <IMAGE>
