Abstract (en)
A terminal and fuse box with double electrical insulation for lighting pole junctions, comprising a box-like element (2) which can be interlocked frontally in a vertically elongated opening of a pole and whose inlet can be closed by a cover (11) which is hinged on a horizontal axis, the bottom face of the box-like element (2) having coupling means for an interchangeable terminal strip (26) contained in an enclosure made of insulating material, engagement means (17) being provided on the inner face of the cover for at least one fuse holder (18). <IMAGE>
