Abstract (en)  
[origin: DE19804233A1] The present invention relates to an abrasive-medium ejector gun (1) which has separate inlets for pressurised air, water and the abrasive medium and comprises an outlet opening (17) for the abrasive medium mixed with the pressurised air and water. In order to provide an improved wetting of the abrasive medium, a first mixing device (24) is used for adding water to the pressurised air, while a second mixing device (19) is used for adding the abrasive agent to the water-pressurised air mixture.
