Abstract (en)

[origin: FR2774693A1] The invention concerns a fuel mixture containing acetylene, propane and propylene, such that the ratio Q_p/Q_a of the proportion (Q_p) of propane and propylene to the proportion (Q_a) of acetylene is such that: $1.1 \leq Q_p/Q_a \leq 4$. Preferably, the propane/propylene proportion in the gas mixture ranges between 50:50 and 99:1. Advantageously, the gas mixture contains 15 % to 50 % by volume of acetylene, the remainder being propane and propylene. The invention is applicable to a fuel mixture for oxyacetylene cutting of metals, the fuel mixture being produced on the site of operation, in particular in a gas mixer.
