Abstract (en)

[origin: EP1053765A1] The invention relates to a safety device for occupants of road or water vehicles. There are emergency situations in which the occupants cannot leave the vehicle, for example when it has hit the water and has flooded completely or partially, or when the interior of the vehicle is filled with smoke and combustion gasses and the occupants are at risk of drowning or suffocating. The invention is characterized in that said device offers the occupants of the vehicle the possibility to administer themselves of oxygen in an easy way during emergency situations, or any other moment and at the same time breathe in as little as possible, smoke and combustion gasses possibly present. <IMAGE>
