Abstract (en)

The crimping tool comprises a frame having first and second jaws, and a first die connected to the frame at one of the jaws, the crimping tool further comprising a co-operating die (16) mounted to the frame opposite the first die, the co-operating die comprising a bottom mounting section (54), a top section (56) with at least one crimping surface (68). The co-operating die comprises at least one extending support surface (58a, 58b, 60a, 60b), extending from a side of the co-operating die, said surface resting against an edge of the frame. <IMAGE>
