Abstract (en)  
[origin: EP1054105A2] The rig consists of several track regulating gantries to place and adjust a pre-assembled track grid on a bed and fix it in place by casting. A traveling gantry (1) consists of two or more gantry supports (2) and a connecting longitudinal strut (4). The regulating gantries (5) are suspended and detachable from and move on the longitudinal strut, along the support bed of the perma way. The support feet of the regulating gantries have holders for detachable shuttering boards.
