Abstract (en)

[origin: EP1054127A2] The fixture is for the rotary location of a pane or panel in an arch frame and has an arm (1) in ended for installation on t upper horizontal rabbet surface of the pane or panel and a movable bearing part (5) forming part of a rotary bearing with a vert rotary axis. A bearing angle (3) connects the arm with the movable bearing part and has horizontal and vertical legs (30,40). The arm (1) lies flatly on the horizontal leg (30) of the bearing angle (3). On the horizontal leg of the bearing angle is least one upwardly bent finger, which acts in conjunction with a corresponding recess of the arm to move the arm longitudinally. adjustment screw (7) is rotatably fitted in a stamped-out recess in the horizontal leg of the bearing angle and is supported immovably in the longitudinal direction.
