Abstract (en)
[origin: EP1054131A2] The wooden structural part for a building comprises several superimposed, stacked, glued thin sheet layers (1,2), in which a second layer is formed as a frame of strip-shaped layer sheets (1a,1b). The outer edges surrounding each layer are aligned with the outer edges (1a'-2b') of at least one adjacent layer. The blunt abutment between adjacent layer sheets of a frame-shaped layer is overlapped by a layer sheet of the adjacent layer (2).
