Abstract (en)  
Non-housed servicing unit for pressurized air has at least two connecting supports that can be pushed into and removed from tube ends guiding the pressurized air, and a flange for an external additional device lying between the two connecting supports. functional elements of the servicing unit lie without a housing inside the connecting supports and the flange.

Abstract (de)  
Die Erfindung betrifft eine Wartungseinheit für Druckluft mit wenigstens zwei Anschlußstutzen, wobei die Wartungseinheit gehäusefrei ausgebildet ist, indem die Anschlußstutzen in die freien, Druckluft führenden Rohrenden einschiebbar oder auf diese aufschiebbar sind.
