Abstract (en)

[origin: EP1054214A2] Analyzer has devices for processing data transmitted from a control and regulating apparatus and from the flue gas system. Preferred Features: Devices are arranged in the analyzer for processing data from a further regulator. Parameters of the combustion plant, analyzer, control and regulating apparatus and regulator are adjusted by the processed data. Measurement of the flue gases in the flue gas system can be controlled by data transmitted from the control and regulating device.
