Abstract (en)
The invention relates to a method for arranging ventilation in a room space, particularly a restaurant space, and a respective ventilation arrangement. The room space is divided into areas designated for smokers and non-smokers. According to the invention, at the border (4; 4a) of said areas, in the ceiling structures (5), there is arranged a downwardly directed air flow stop (6; 6a, 6b), and the air exhaust from the room space is arranged to take place at least partly in the vicinity of said stop (6; 6a, 6b). In said stop (6; 6a, 6b), there is provided a number of exhaust air apertures (8; 8a, 8b), which are connected to an exhaust air apparatus. <IMAGE>
