Abstract (en)

The holder is for has a trigger stirrup and stop bolt (3) located in the holster housing pivotably around a pivot axis. A st nose formation of the stop bolt contacts the inside of the trigger stirrup. On the stop bolt (3) around a pivot axis parallel to the pivot axis a pivotable securing plate (7) is located. The securing plate is subjected to the force of a spring, impelling the stop bolt into its locked position. The stop bolt has an operating nose formation, on which a slider (12) can act in the opening direction of the stop bolt.
