Abstract (en)
[origin: US6481639B1] The invention concerns a volatile substance diffuser (102) comprising a body (104) with an aperture (111), and a reservoir (120) of product, comprising a volatile substance, the reservoir (102) being mounted mobile in the body (104) between a diffusing position enabling a gas to circulate through the product, then through the aperture (111) and a closed position wherein the product is isolated from the aperture (111), the reservoir and the body having respective surfaces (122,116) extending opposite each other. One of the surfaces (122) is spherical.
