Abstract (en)

[origin: WO9941088A1] The invention relates to a folder (3) comprising a cover (2) and a binding device with two binding pins (5) for receiving and holding perforated sheets (6) which have corresponding holes assigned to an outer edge (7). To make this kind of folder (3) easier to handle and produce the invention provides for the binding pins (5) on their upper side to have a preformed angled piece (8) the dimensions of which exceed those of the perforated holes of the sheets (6).
