Abstract (en)
[origin: WO9936793A1] A phase noise measurement system (2000) including a low noise programmable synthesizer (1) and a receiver/down converter (2) is provided. The low noise synthesizer (1) provides L-Band Signals which can selectively exhibit low noise close-in or low noise far out. The receiver/down converter (2) provides for absolute, additive, and down converted/direct/multiple phase noise measurement.
