Abstract (en)  
[origin: WO9940544A1] According to the present invention, there is provided a system including vehicles and fuel dispensing stations, wherein the vehicles and the stations include means whereby the cost of fuel is adjusted automatically in dependence on electronic information related to at least one of: the route of the vehicle; the date; the day of the week; the time of day; an indication of shared utilisation of the vehicle at least in part via a removable data transfer device; and the nature of the vehicle.
