Abstract (en)

[origin: EP1055755A2] The cams on the carriage of a flat bed knitting machine are adjusted by two stepping motors driving two pinions (93,95). One pinion (93) engages two racks (100,200) that move in opposite directions to adjust two cams for the needle sinkers. The other pi (95) moves a cam plate (300) with the other cam tracks (320,340,350,360).
