Abstract (en)

[origin: EP1056059A2] Acoustic-magnetic security tags on goods in a store are passed through a deactivation unit (1) at the check out. The unit is in the form of a duct through which the items are passed. The duct has a number of deactivation coils (4,5) and are surrounded by an iron sheath (10). The coils are supplied by a controlled (7) power supply (8).
