Abstract (en)  
[origin: WO9941996A1] The present invention relates to a probiotic composition comprising spores from one more strains of the yeast species *Endomyces fibuliger* (also named *Saccharomyces fibuliger* etc.). The composition can be used, on one hand, as feed additive to mammals (mainly monogastric ones), avian and fish for better growth and feed utilization and, on the other hand, as pharmaceutical/naturopathic preparation for human and animals, avian and fish, in particular against gastrointestinal disorders. Further, the composition can be used for controlling food intake. In addition, the composition can be used in order to inhibit putrefaction and mould growth, respectively.
