Abstract (en)

[origin: WO9943335A1] Compositions comprising a water/organic solvent extract of clover from which aromatic chromophore containing compounds including the isoflavones genistein, daidzein, formononetin and biochanin and/or their glycosides have been removed, said extract having anti-cancer activity against one or more of the cell lines HL60, K562, LNCaP or HT29, optionally in association with one or more pharmaceutically acceptable carriers, excipients, auxiliaries, and/or diluents are described as are processes for the production of these compositions. Methods of treatment, prophylaxis, amelioration or defence against cancer are also disclosed.
