Abstract (en)
[origin: WO9941350A1] The invention relates to two-phase or multi-phase washing and cleaning agent shaped bodies consisting of compacted, particle-shaped washing and cleaning agents, comprising builder(s), bleaching agents, bleach activator(s) and optionally other washing and cleaning agent components. Optimum stability of oxidation-sensitive materials is achieved by physically separating the bleach activator(s) from the oxidation-sensitive materials in a defined region of the shaped body.
