Abstract (en)

[origin: EP0931870A1] The present invention relates to a process for applying a mixture (10) to a surface (11) in three steps, a first step of providing a hand-held container (1) defining a mixing volume (12) and comprising friction means (13), the second step of inserting within the mixing volume (12) two products (2, 3) for forming the mixture (10), the third step for applying the mixture (10) on the surface (11) and using the friction means (13), characterised in that the hand-held container (1) is a dispensing device (1) of the re-usable type for machine washing. In another aspect, the invention also relates to a dispensing device (1) of the re-usable type for machine washing having friction means (13) and a base (14), characterised in that the friction means (13) is on the outer surface of the base (14), the friction means (13) having a length along one direction of at least 4 cm
