Abstract (en)
[origin: DE19903310A1] for bridge structure (1) as cover bridge the concrete flange (6) of the compound ready-made part support is formed as a full-surfaced shuttering component and with an adjacent compound ready-made part support forms the shuttering for the in-situ produced concrete plate. The concrete flange is connected by means of dowels in a forced locking arrangement with the steel support (5).
