Abstract (en)

[origin: DE19807215A1] The control system has an engine management unit (1), an exhaust gas probe (2) with an interface (21) to the engine controller, an evaluation unit (211) integrated into the interface for digitising measurement values, a connecting line between the probe and interface for transferring probe measurement values and a connecting line (11) for transferring the digitised measurement values from the evaluation unit to the controller. The interface is a plug connector whose housing (23) contains the evaluation unit (211), which is integrated into it.
