Abstract (en)
The enclosure is delimited by a fence and has inside a tower (2) which supports an antenna (14), as well as a housing (1) which contains the emission and reception equipments. It is characterized in that three of the external walls of the housing (1) are in contact with the fence (3) and the other external face of the housing (1) is separated by a certain distance from the fence (3) section which is parallel to said external wall; this configuration defines a space wherein the tower (2) is located while leaving a free space between the housing (1), the tower (2) and the fence (3). Within said free space are included the door giving access to the housing (5) and the door giving access to the enclosure (4). <IMAGE>
