Abstract (en)  
[origin: EP1058212A2] Process has the following steps: in a process station (12-14), reading of dispatch data and attachment of a machine readable marking to the mail item and item storage; transport of the marked item (A) to a remote delivery station (10) with a franking machine (60) and transfer of mail data from the marking to franking machine memory (69); franking of the mail using data stored in the memory. An Independent claim is made for a post processing system using the above process.
