Abstract (en)
[origin: WO9943436A1] The invention provides comminuting and/or homogenising apparatus comprising a vessel (3) provided with a rotatable shaft, the shaft being provided with one or more arms (17) extending therefrom, the bottom arm (27) on the shaft being provided with a bottom face corresponding to the opposing base (5) of the vessel and/or provided with one or two end faces corresponding to the side (9) of the vessel (3). The invention results in more effective comminuting and/or homogenising and minimises hold-up in the apparatus after processing.
